General information

The Ministry plans to create a number of videos that would demonstrate how teachers could utilize the redesigned curriculum to create rich learning opportunities for their students. The goals of these videos is to help teachers understand how the redesigned curriculum works as a conceptual, competency-driven model. The videos will provide examples and possibilities of how to use the redesigned curriculum, and be distinct from one another to ensure no single approach is promoted and to demonstrate that there are many ways to approach the curriculum. Team members will develop scenarios for the videos as outlined. The work will consist of attending a three-day meeting in Vancouver in late January 2016 (dates to be determined).
